Durango, Colorado 81301

Greetings TACO Members!

It is my privilege to run for a seat on the TACO Executive Board this year.

A TACO Director with relevant experience would serve the community well. I currently serve as an independent director for a public company, and have served as board chairman of two trade organizations in the past. As a public company director, I have served on the Audit Committee and currently serve on the Governance & Compensation Committee and Health, Safety and Environment Committee. Combined with my many years of executive management business experience would make me a productive Director that would serve the homeowners well.

Business experience aside ... an effective TACO Director should also be involved with our community and demonstrate a willingness to work to make positive changes. In that vein, after three seasons of observation, the TACO Board allowed me to re-establish and chair the Landscape Committee. Since then, a number of community members and I have worked diligently to develop a three-year approach to improving the grounds at Tamarron. Year one is focused on upgrading the Highpoint landscape. However, there have been improvements, both seen and unseen, elsewhere. Working on this Committee has allowed me to interact with homeowners, TACO management, and members of the Board ... all of which have provided a necessary understanding of the community's interests.

If elected to the Board, I will serve the Association with an independent mindset that is open to fresh ideas, but also with respect for all the past work that has resulted in our beautiful mountain community. Most of all, I will treat each and every homeowner as a shareholder with a voice that should be heard. After all, the Board is elected by you and works for you!

In closing, time here at Tamarron is a homecoming of sorts. Being a Ft. Lewis College graduate, Durango has always had a soft place in my heart. Years later, my wife and I are now privileged to live here.
